

steroids, antibiotics, and anti-inflammatory enzymes.

Because of the diversity of its actions, much more clinical study will be needed before physicians can form a final opinion on lysozyme.

EMIGRANT DOCTORS

A recent statistical survey, published in the *British Medical Journal*, shows that, in the last decade, 4,900 doctors trained in British medical schools left the UK.

Of the 4,900, the majority, 3,600, are now registered in the following countries: Australia, Canada, New Zealand, United States of America, South Africa, Northern Rhodesia and Southern Rhodesia. In order of importance, Canada, Australia and the United States registered the greatest inflow.

The number of emigrants is nearly a quarter of the average annual output from the British medical schools.

From the report, it is difficult to find out with accuracy why doctors are emigrating on this scale; however, the new residents have given some of the reasons which induced them to migrate. For example, the exodus to the United

States is caused, to a great extent, by the attractions of excellent research facilities and higher salaries.

Half the British doctors living in the USA are teachers or research scientists in full-time appointments. The proportion of UK doctors working in academic medicine is much lower in Canada and in Australia. Australia, in particular, appears to have attracted general practitioners dissatisfied with conditions in Britain. Many considered general practice in England as a low status position.

RENAL TRANSPLANTS

We have received many letters asking for information about renal transplantation and the medico-surgical centers which specialize in this field. Below is a list of the main American, British and French teams:

USA: J. E. Murray, Peter Bent Brigham Hospital, Boston; Paul J. Russell, Massachusetts General Hospital, Boston; W. J. Kolff, Cleveland Clinic, Cleveland, Ohio; J. E. Starzl, University of Colorado, Medical Center, Denver; W. E. Goodwin, University of

California, Medical Center, Los Angeles; Charles F. Zukoski, Veterans Hospital, Nashville, Tennessee; David M. Hume, University of Virginia, Medical Center, Richmond; Keith Reemtsma, Tulane University, New Orleans.

UK: W. Peart, St. Mary's Hospital, London; Roy Calne, Westminster Hospital, London; Ralph Shackman, Hammersmith Hospital, London; F. M. Parsons, United Leeds Hospital, Leeds, Yorkshire; Michael F. Woodruff, University of Edinburgh, Medical School, Edinburgh, Scotland.

FRANCE: J. Hamburger, Hôpital Necker, Paris; R. Kuss, Hôpital Foch, Paris. □

(Correspondence should be addressed to the Manager of the Abbott affiliate nearest you; addresses are listed on our contents page.)

Because of a minor error in the article "Fundamental concepts in the treatment of diabetes," by Garfield Duncan, MD, published in ABBOTTEMPO Vol. 2, No. 2, it is suggested that the last paragraph in the second column of Page 12 of that issue be disregarded.

INDEX TO AUTHORS

With this edition, ABBOTTEMPO completes its second year. Here, for readers' reference, is an index to authors who contributed to the four issues of ABBOTTEMPO in 1964. Roman numerals indicate the edition, Arabic numerals the opening page of the article.

ALBERT-WEIL, Jean, MD:
Malingering, II, 20.
ANDERSSON, Prof. Bô, MD:
Diabetes Mellitus (symposium), II, 4.

BARTON, Kenneth M., MD:
Diseases of the Digestive Tract (symposium), III, 5.
BELLANGER, Dr. Gérard:
Splenoportography, I, 22.

CARDEW, Bruce, MD:
Physician Extraordinary, I, 28.
CHANG, Te Wen, MD:
Virus Diseases (symposium), I, 6.
CLEM, Alfred:
Edge of Dark Land, I, 15.
COCKERHAM, Leroy:
Diseases of the Digestive Tract (symposium), III, 5.

DEMOLE, Michel, MD:
Diseases of the Digestive Tract (symposium), III, 2.
DINGMAN, Harvey F., PhD:
Tattooing and Deviant Behavior, IV, 23.

DUBOURG, Alain-Yves, MD:
DNA and Virus, I, 2.
DUMAITRE, Paule:
Six Centuries of Medical Art, III, 18.
DUNCAN, Garfield, MD:
Diabetes Mellitus (symposium), II, 12.
DUVELLEROY, J., MD:
Emergency Aboard, II, 17.

EDGERTON, Robert B., MD:
Tattooing and Deviant Behavior, IV, 23.

FOSTIROPOULOS, G., MD:
Rheumatology (symposium), IV, 10.
FRIED, Ralph I., MD:
Pediatrics and Modern Art, IV, 16.

GARNIER, H., MD:
Diabetes Mellitus (symposium), II, 10.
GELFAND, Michael, MD:
Meet the Nganga, II, 30.
GOLDBLAT, A., MD:
Past, Present and Future of Anesthesiology, III, 24.

HARDENBROOK, Harry:
Edge of Dark Land, I, 15.
HELLRIEGEL, Kurt O., MD:
Life at High Altitude, IV, 2.

ISSELBACHER, Kurt J., MD:
Diseases of the Digestive Tract (symposium), III, 9.

KANTOR, Thomas G., MD:
Rheumatology (symposium), IV, 7.
KIRSNER, Joseph B., MD:
Diseases of the Digestive Tract (symposium), III, 5.
KLEINSASSER, O., MD:
Laryngoscopy, III, 15.

KRANE, S. M., MD:
Rheumatology (symposium), IV, 10.
KRUGMAN, Prof. Saul:
Virus Diseases (symposium), I, 12.

LANDA, José A., MD:
Diabetes Mellitus (symposium), II, 2.
LEGER, Prof. Lucien:
Splenoportography, I, 22.

MAHDIHASSAN, Dr. S.:
Basic concepts of Alchemy, I, 31.
MONNINGER, R., MD:
Diabetes Mellitus (symposium), II, 7.
MURRAY, Joseph E., MD:
Kidney transplantation, II, 23.

NAGANT DE DEUXCHAISNES, C., MD:
Rheumatology (symposium), IV, 10.
NOVICH, Max M., MD:
Doping in sport, II, 26.
NUZZOLO, Prof. L.:
Virus Diseases (symposium), I, 9.

De OYA, Prof. J. C.:
Rheumatology (symposium), IV, 13.

RAVICH, Robert A., MD:
Shakespeare the Psychiatrist, III, 28.
RENTCHNICK, Pierre, MD:
Virus Diseases (symposium), I, 4.

SHERLOCK, Sheila, MD:
Diseases of the Digestive Tract (symposium), III, 12.

TRIMMER, Eric J., MB, BS:
Menace of the Mountebank, IV, 30.

WILLIAMS, J. A., Ch.M, FRCS:
Diagnostic Bone Biopsy, IV, 26.
